AMENDMENT TO THE SPECIFICATION

Please amend page 1, first paragraph of the specification, by marked up replacement paragraph(s) as follows.

The invention relates generally to communications between a wide area network and a handheld device and, more particularly, to a system, a [[and]] method and a computer-readable storage medium storing computer-executable instructions that, when executed by a processor, cause an apparatus to perform the method for downloading, via a wireless communications interface, an application from a server on a wide area network to a handheld device, such as a cellular mobile phone or a personal digital assistant (PDA), without using a browser.
